CONCLUSION AND RECOMMENDATIONS 22

ANNEXURE 23-53

FOREWORD

The Ministry of Environment, Forestry and Tourism remains committed to its mandate to compile and publish arrival tourism statistics within six month after year end. The purpose of this report is to provide key tourist information and insights to statistics users to track the industry performance, facilitate sound and efficient decision making, formulate strategies, interventions, policies and budgets to support the growth of the sector.

SARS COVID-19, has negatively impacted the tourism sector globally including Namibia by a decrease of 89% in arrivals towards the end of 2019.

The current tourism economic circumstances call for an adoption of a coherent, comprehensive but innovative strategic approach(es) by key government stakeholders such as Health, Justice, Immigration, International relations and tourism decision makers to increase business confidence in the tourism sector. I am certain that the industry will adopt going forward new strategies of doing travel and tourism business.

After the launch of the Tourism Revival Initiative, the Ministry has put in place a national Tourism Task Force to coordinate the country's tourism revival effort. Issuance of visa upon arrival initiative was successfully implemented, Tourism Health and Safety Toolkit launched, tourist arrivals began in September 2020 and borders gradually opened up. All these were interventions to increase tourist arrivals in Namibia in order to inject liquidity into the sector, sustain businesses and protect livelihoods. We will support the efforts of the national Tourism Task Force to adopt trends and sound best practices to ensure a bright future of travel and tourism industry in Namibia.

The 2020 arrival statistics shows a significant decline of 89% in the tourism arrivals with only 169,565 tourists from 1,595,973 tourists recorded in the previous year (2019).

We are looking forward for a better year ahead, given ongoing targeted efforts by our Government to increase vaccination coverage for the citizens to improve traveler confidence that Namibia is a safe tourism destination.

The Ministry hopes that this report will be a useful tool in decision making process for all in the tourism sector and other industries.

Hon. Pohamba Shifeta (MP)
Minister of Environment, Forestry and Tourism

PREFACE

The Ministry embarked on the compilation and publication of the Annual Tourist Statistical Reports in 1992, with the aim for the tourism stakeholders to appreciate and monitor the sector performance for planning purposes. Similarly, the Annual Tourist Statistical Reports are used as an input in Tourism Satellite Account (TSA), an account that determines the tourism sector contribution to the Gross Domestic Product (GDP).

The Ministry gathers the data on travelers from the arrival/ departure forms which are completed by all travelers upon entering or departing Namibia at all certified points of entry which include all land borders, airports and harbours.

This report provides information on international travelers into Namibia in the year 2020 with the main focus on Tourist Arrivals. It highlights tourist arrivals by purpose of visit, gender, age, mode of travel and intended length of stay amongst others. The Ministry encourages users of this report to visit the ministerial website: www.met.gov.na for Tourist Statistical Reports from previous years.

Mr. Teofilus Nghitila

Executive Director

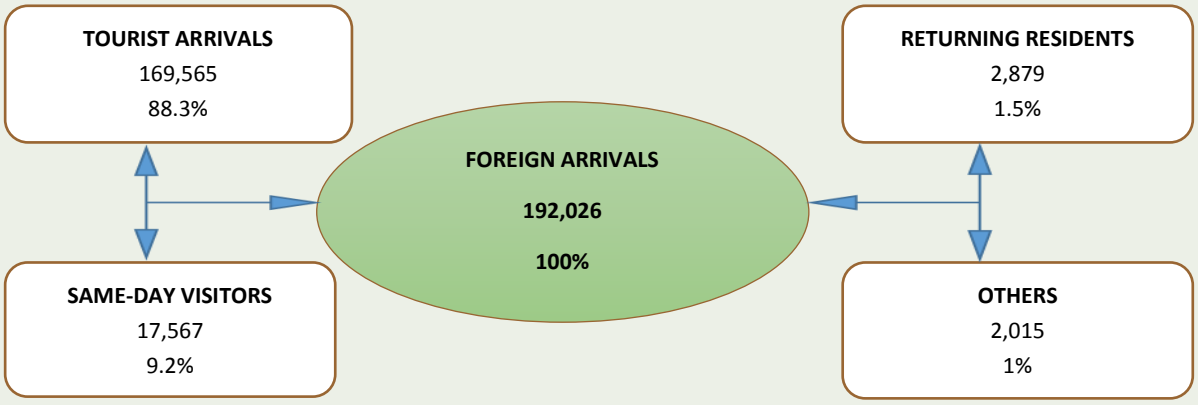

ACKNOWLEDGEMENT

The Ministry would like to thank the Ministry of Home Affairs, Immigration, Safety and Security (MHAISS) for the provision of data used to compile this report. Our appreciation goes out to Namibia Tourism Board (NTB) for marketing Namibia as a Quality Tourism Destination of the world and the national Tourism Revival Initiative Task Force for putting up measures to revitalise the industry during the COVID-19 period. Finally, we thank all our stakeholders for their improved support and collaboration in compiling this report.

INTRODUCTION

Objectives

The tourist statistical report depicts the flow of tourist arrivals in Namibia per annum.

The main objective of this report is to provide up to date statistics to all tourism stakeholders. These statistics are relevant for planning, budgeting and evaluation of tourism programmes and projects as well as for general purposes. The key users of tourism statistics include the Government of the Republic of Namibia (GRN), the Namibia Tourism Board (NTB), Namibia Statistics Agency (NSA), Bank of Namibia (BoN), National Planning Commission (NPC), Federation of Namibia Tourism Associations (FENATA), research institutions, NGOs, donors, universities and the general public.

Report sections

The first section of this report contains comprehensive statistics presented in graphic formats that include foreign arrivals profile; tourist arrivals profile; tourists arrivals by region, purpose of visit, intended length of stay, gender, age group, point of entry, mode of travel and seasonality of travel.

The second part is an Annexure containing detailed statistical tables covering information on tourist profiles as specified in the first section.

Key Concepts and Definitions

Foreign Tourist

A foreign tourist is defined as "any visitor travelling to a country other than that of his/ her residence but outside his/her usual environment for more than 1 night but less than 12 months and whose main purpose of visit is other than the exercise of an activity remunerated from within the place visited". This is the United Nation World Tourism Organisation (UNWTO) definition used to identify who is a foreign tourist visiting Namibia.

Country of Residence

The country of residence is one of the key criteria for determining whether a person arriving in a country is a "visitor" or "other traveller", and if a "visitor" whether he/she is a national or overseas resident. The underlying concept in the classification of international visitors by place of origin is the country of residence, not their nationality. Foreign nationals residing in a country are assimilated with "other resident" for the purpose of domestic and outbound tourism statistics. In this report, however, they fall under "Returning Residents" category of foreign arrivals.

Purpose of Visit

The main purpose of a tourism trip to a country (or place) is defined as "the purpose in the absence of which the trip would not have taken place". It is determined by the main activities in which the visitors has been or will be involved during the trip at destination. The main purpose of visit for tourists are classified into four categories, which are: Visiting Friends/Relatives, Holiday, Business, and Other (those reason that did not fall under the other three categories).

"**Other purposes**" category of Tourist Arrivals is made up of In-transit travellers
"Scandinavia" is made up of Denmark, Norway, Finland and Sweden countries

The above definitions and classifications were applied in this study and, being internationally accepted, will allow for global comparison of Namibia's tourism statistics.

Stakeholders' consultation

Final Report

FOREIGN ARRIVALS PROFILE

A total of 192,026 foreign arrivals were registered in Namibia in 2020. This figure exposes a significant fall of 88.6% from 1,681,336 arrivals in 2019. This substantial drop in the number could be attributed to the COVID-19 pandemic, which led to the closure of Namibia's points of entry that lasted from mid-March 2020 until mid-September 2020. Afterwards the country started gradually opening up the points of entry for international visitors with the aim to revive the industry. Figure 1 below, illustrates the foreign arrivals into Namibia for the past six (6) years and figure 2 represents the percentage(%) distribution of foreign arrivals by categories of travel for 2019-2020.

TOURIST ARRIVALS PROFILE

The total tourist arrivals figure of 169,565 received in 2020 revealed a massive 89.4% decline in comparison to the 1,595,973 tourists of the previous year. 81.0% of these tourists were recorded in the first quarter of the year (January to March). This demonstrates just how the COVID-19 pandemic has negatively impacted tourists travel. In the past years, tourist arrivals have been increasing moderately as unmasked in the diagram below.

Figure 3: Tourist Arrivals by Year: 2015- 2020

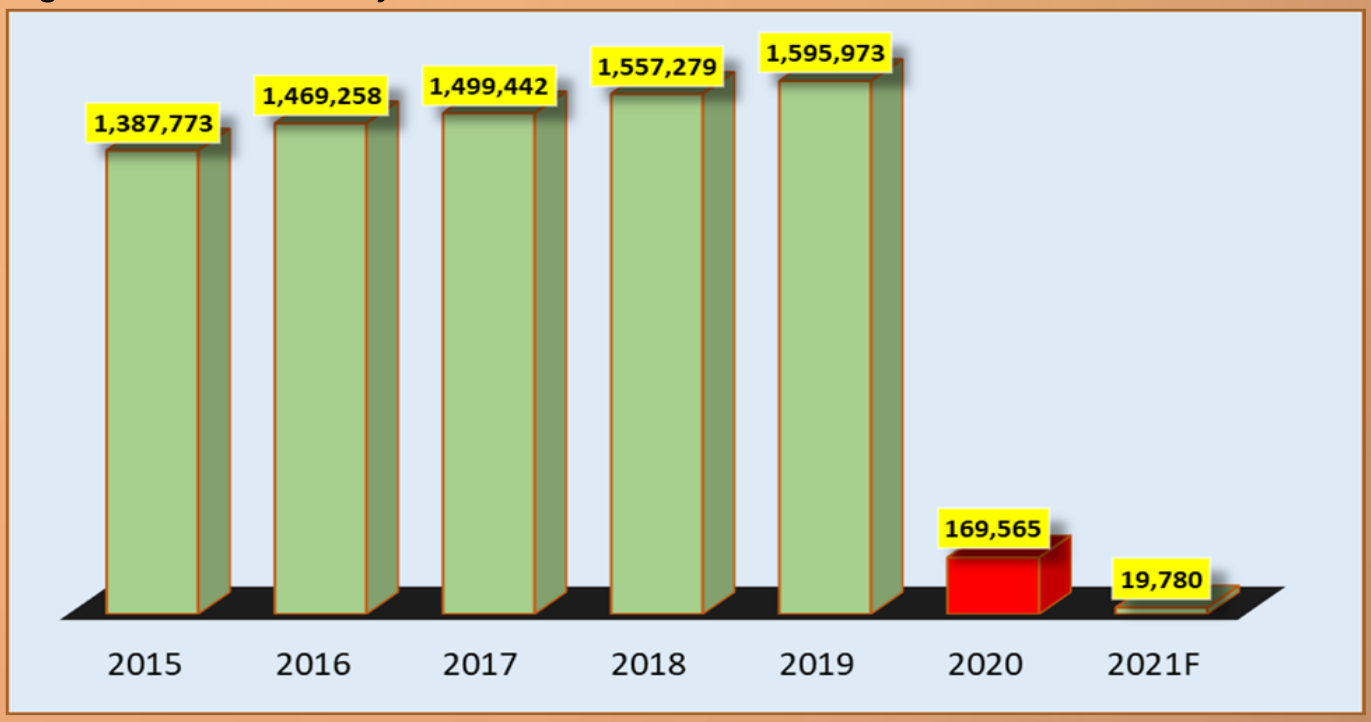

Figure 4: Tourist Arrivals - Growth Rate: 2015 - 2020

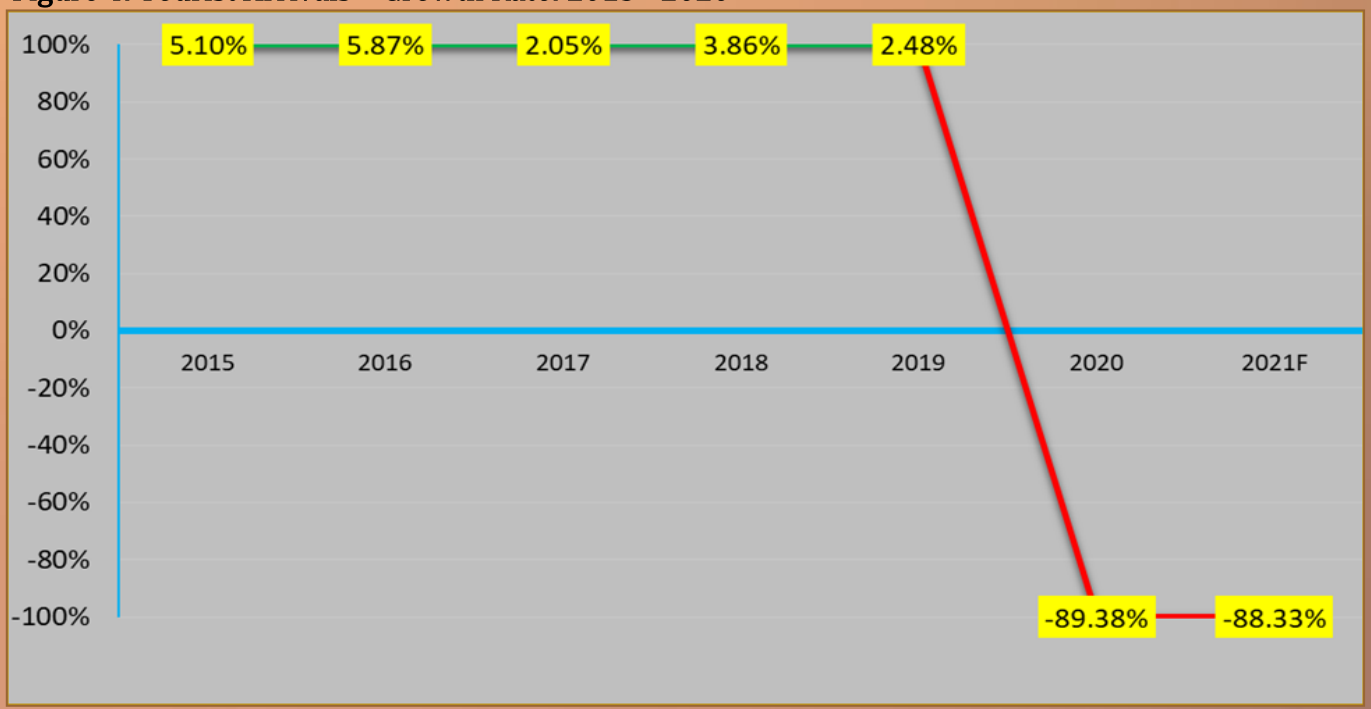

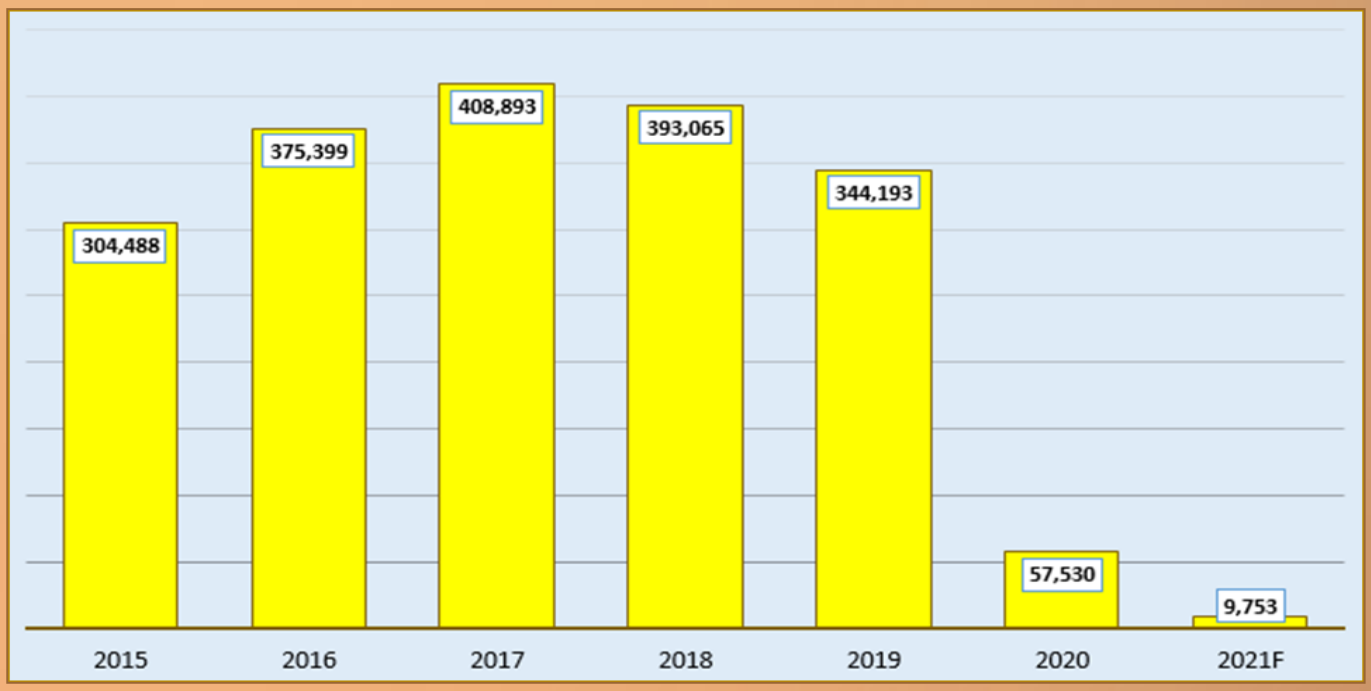

Figure 5: Overseas Tourist Arrivals : 2015 - 2020

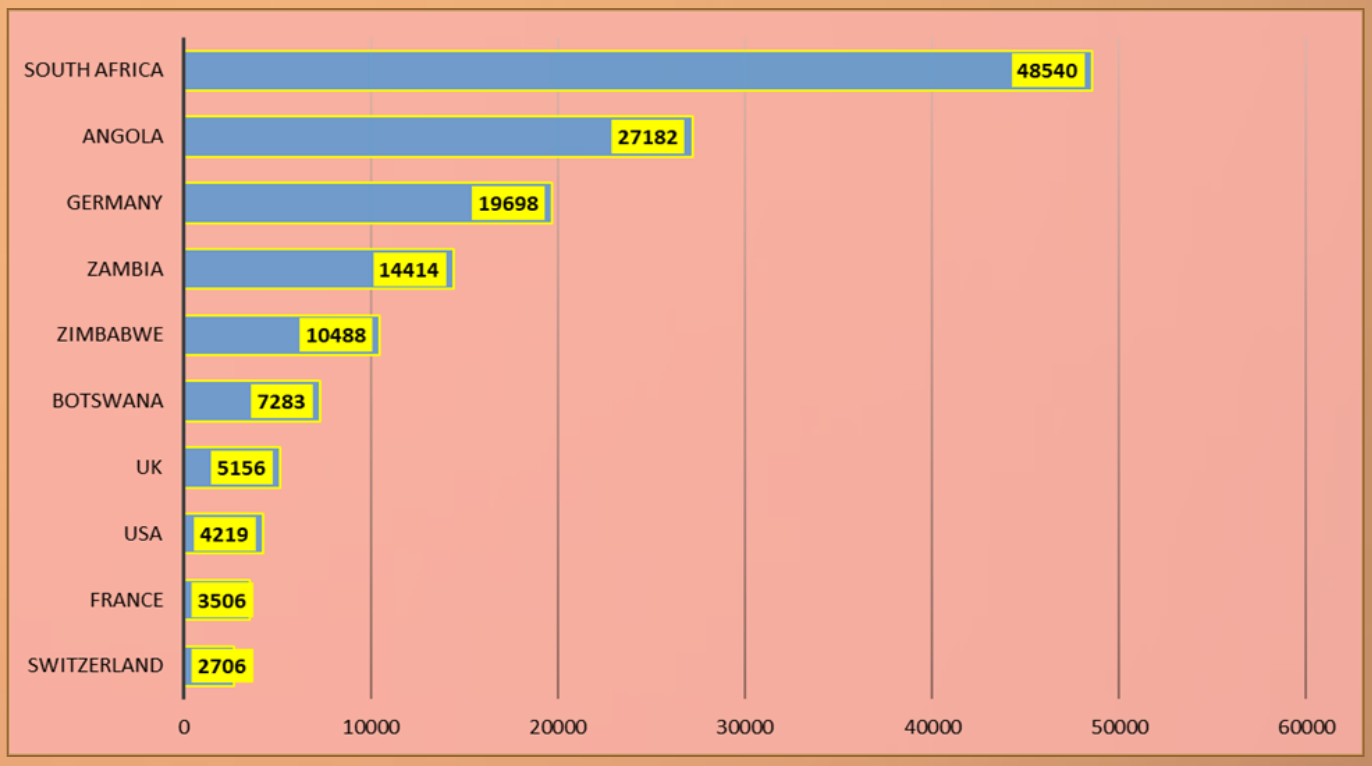

In total, overseas tourist arrivals made up 33.9% of the total tourist arrivals. Although overseas arrivals have been increasing moderately before 2017, a slight decline has been observed in 2018 and 2019. However, in 2020, a dramatic decline of 83.3% can be noticed in overseas arrivals.

TOP TEN TOURIST MARKETS

South Africa overtook Angola into becoming the main African market providing 28.6% of total tourists to Namibia in 2020. From the Overseas market, Germany retained their position as the key tourist market making up 11.6% of total tourist arrivals. It is worth noting that although these countries continue to dominate, their arrival figures dropped significantly. The drop in arrivals from Angola could be attributed to the closure of borders between the two countries, which remained closed for the duration of the calendar year.

Figure 6: Top Ten Tourist Markets, 2020

TOURIST ARRIVALS BY REGION

Tourist arrivals from all markets severely fell in 2020 as it can be seen in figure 7(a) to 7(d) below. Arrivals from the African Market experienced a major decline of 91.0% from 2019. The European and North American markets similarly observed a noticeable reduction of 82.2% and 84.0% in that order. Although initially observing a 26.1% positive growth in 2019, the 2020 arrivals from China were not spared however, observing a 91.9% decrease.

Figure 7(a): Tourist Arrivals from African Markets, 2015 -2020

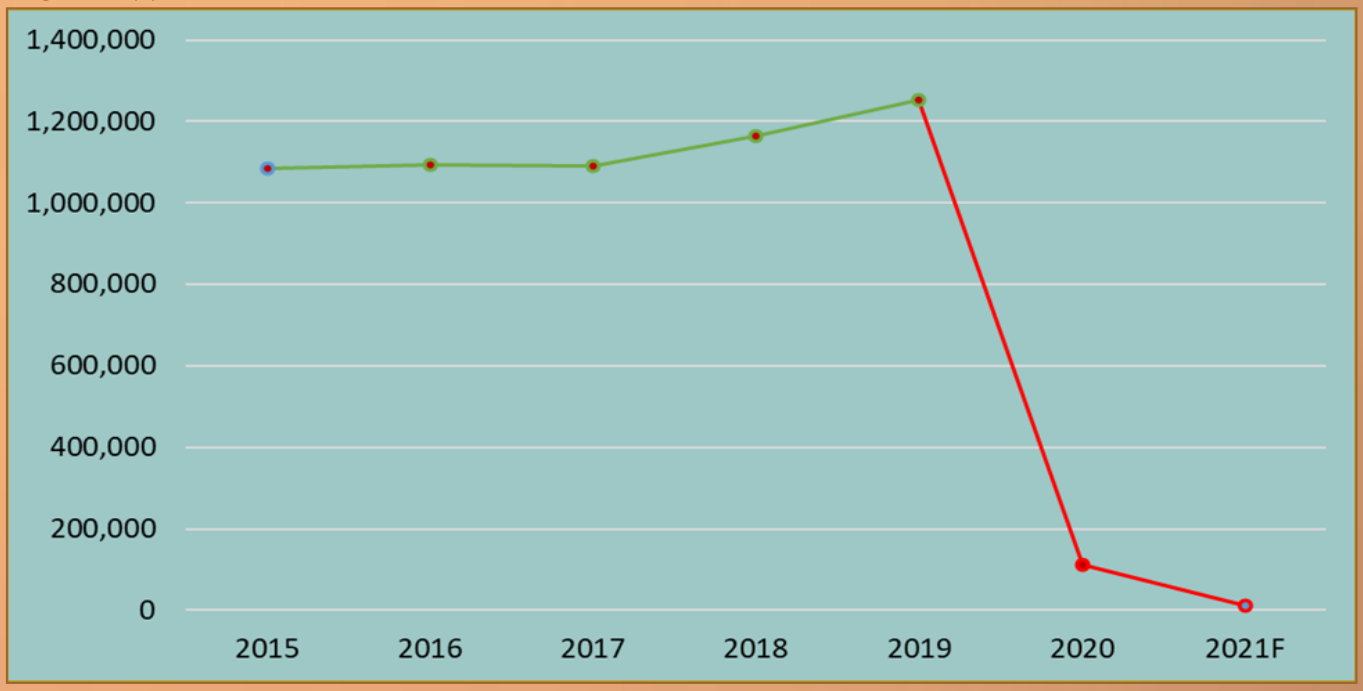

Figure 7(b): Tourist Arrivals from European Markets, 2015-2020

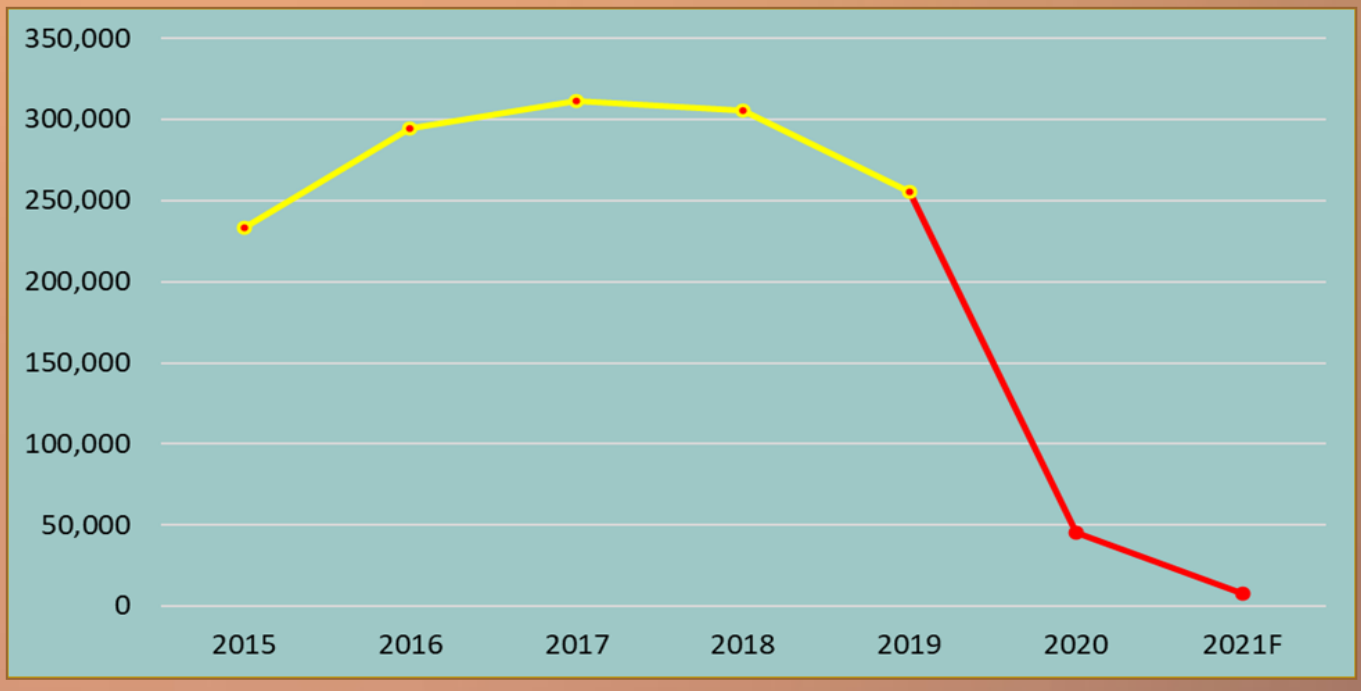

Figure 7(c): Tourist Arrivals from North America, 2015 -2020

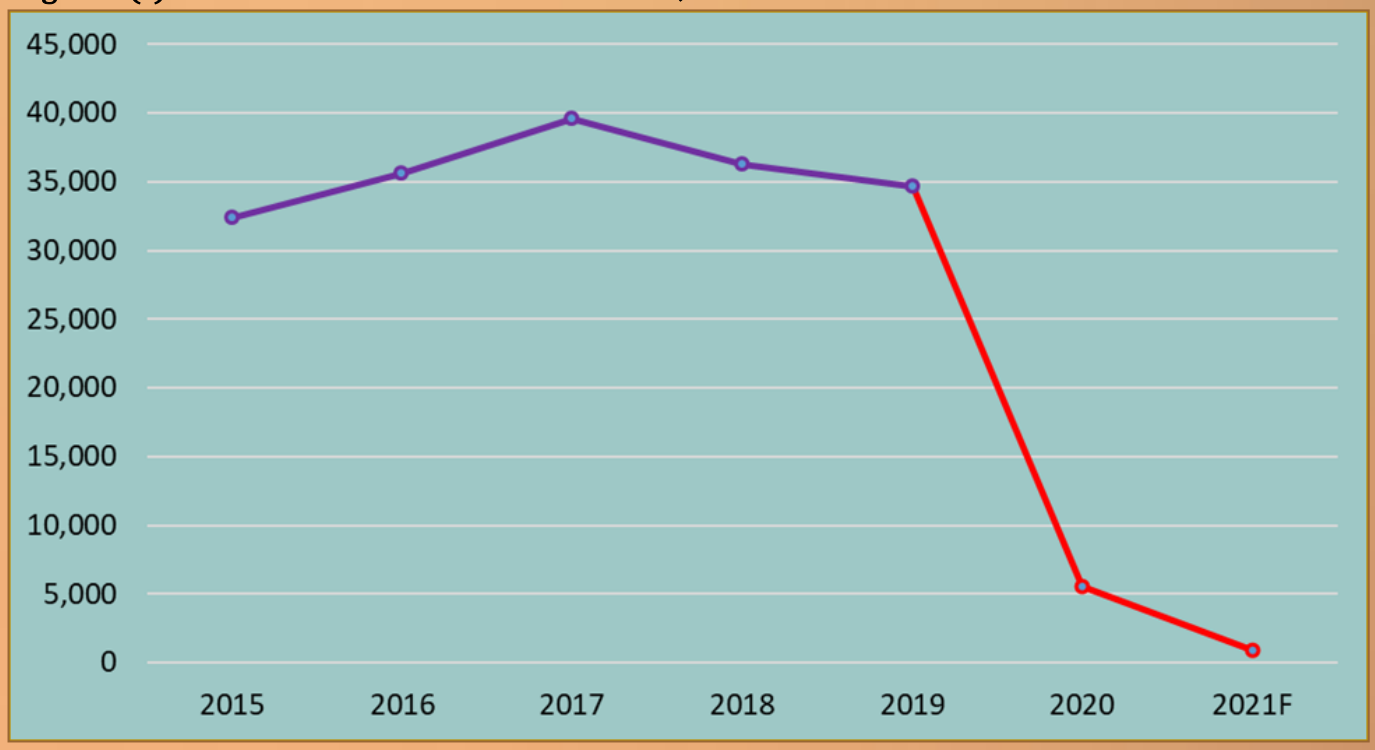

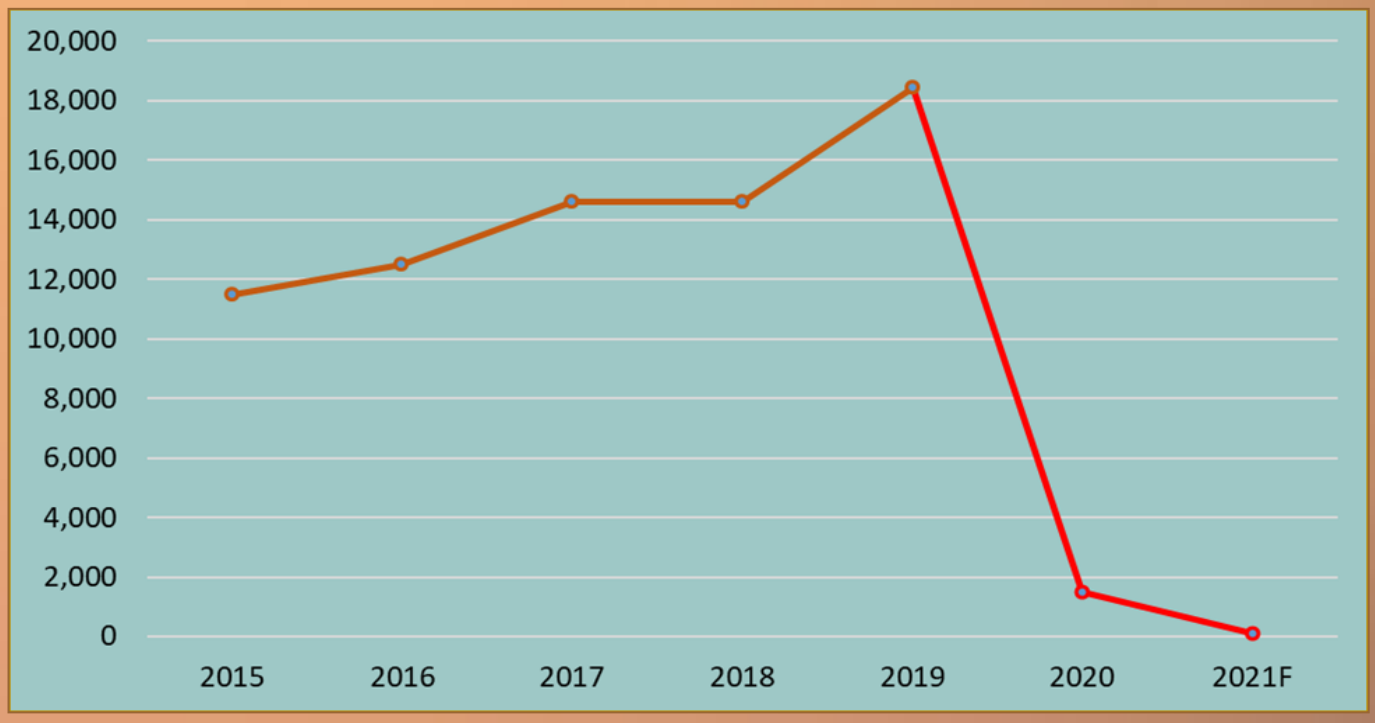

Figure 7(d): Tourist Arrivals from China, 2015 - 2020

TOURIST ARRIVALS BY PURPOSE OF VISIT

The figure below presents the number of tourists by purpose of visit. A significant overall decrease of 92.9% was observed in Visiting friends and relatives from 811, 253 in 2019 to 57,653 in 2020 and 86.3% drop in those who came for holiday from 535,458 in 2019 to 73,587 in 2020. For the business category a fall of 83.2% was recorded from 197,123 tourists in 2019 to 33,040 in 2020 while for those who came for other purposes observed a decrease of 89.9% with 52,139 in 2019 to 5,285 in 2020.

Generally, the decrease in the number of tourist arrivals could be due to the following factors, amongst others:

- Global travel restrictions,
- Bans imposed locally to prevent the spread of COVID-19 such as closing of borders, marking one of the worst years in the history of the tourism industry.

Figure 8 (a): Tourist Arrivals by Purpose of Visit, 2019 -2020

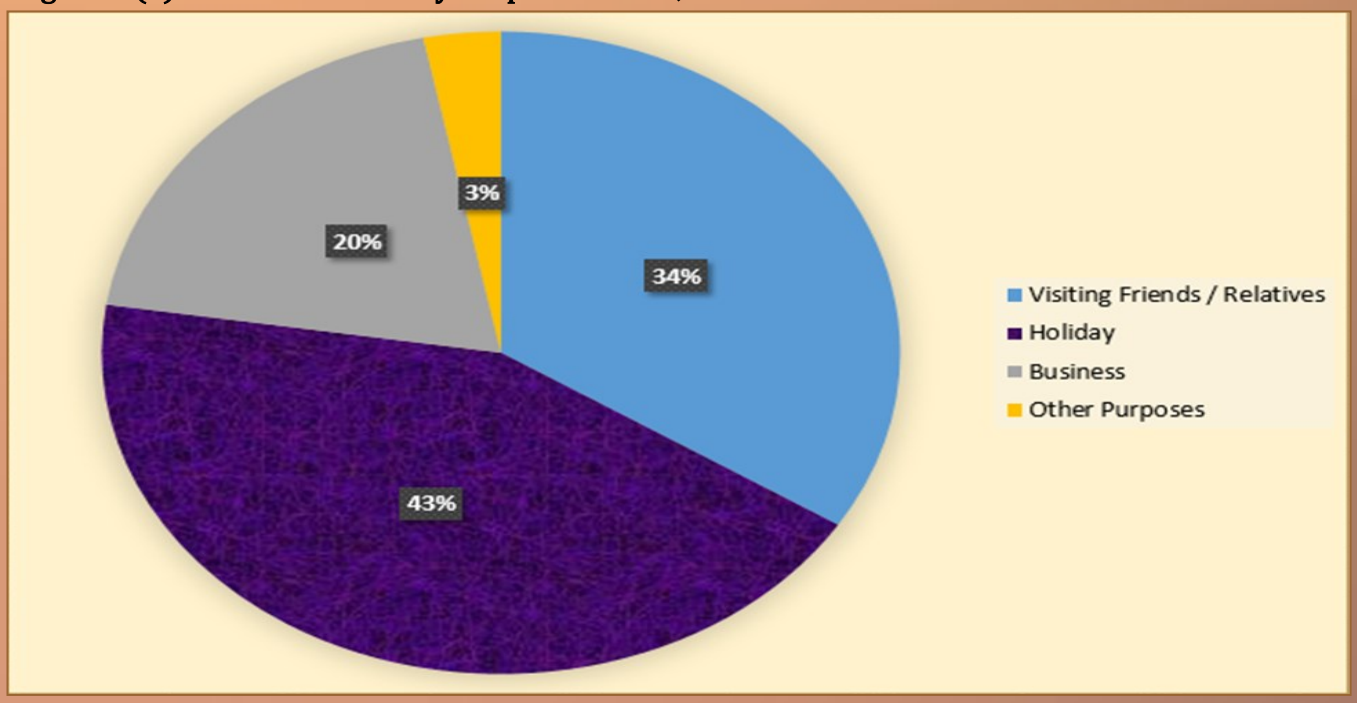

Figure 9: Top Ten Holiday Tourists, 2020

TOP TEN OVERSEAS TOURIST BY PURPOSE OF VISIT

Figure 10(a): Top Ten Overseas Holiday Tourists, 2020

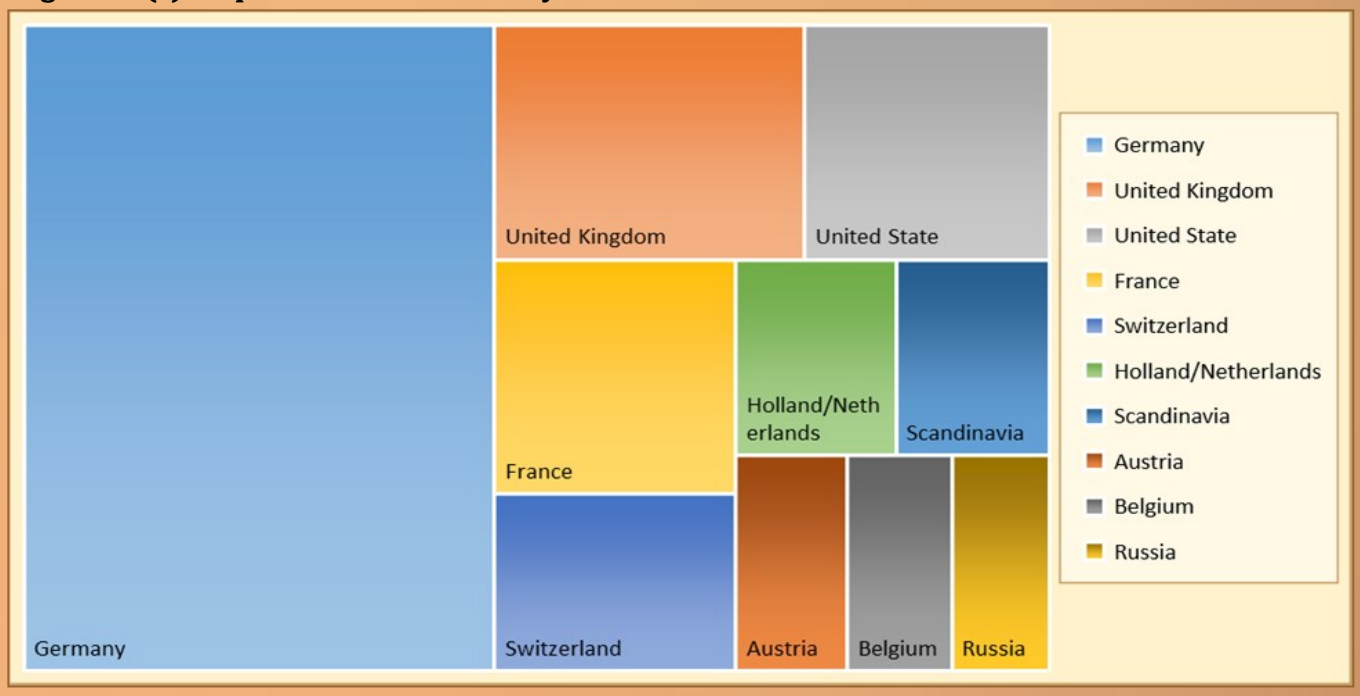

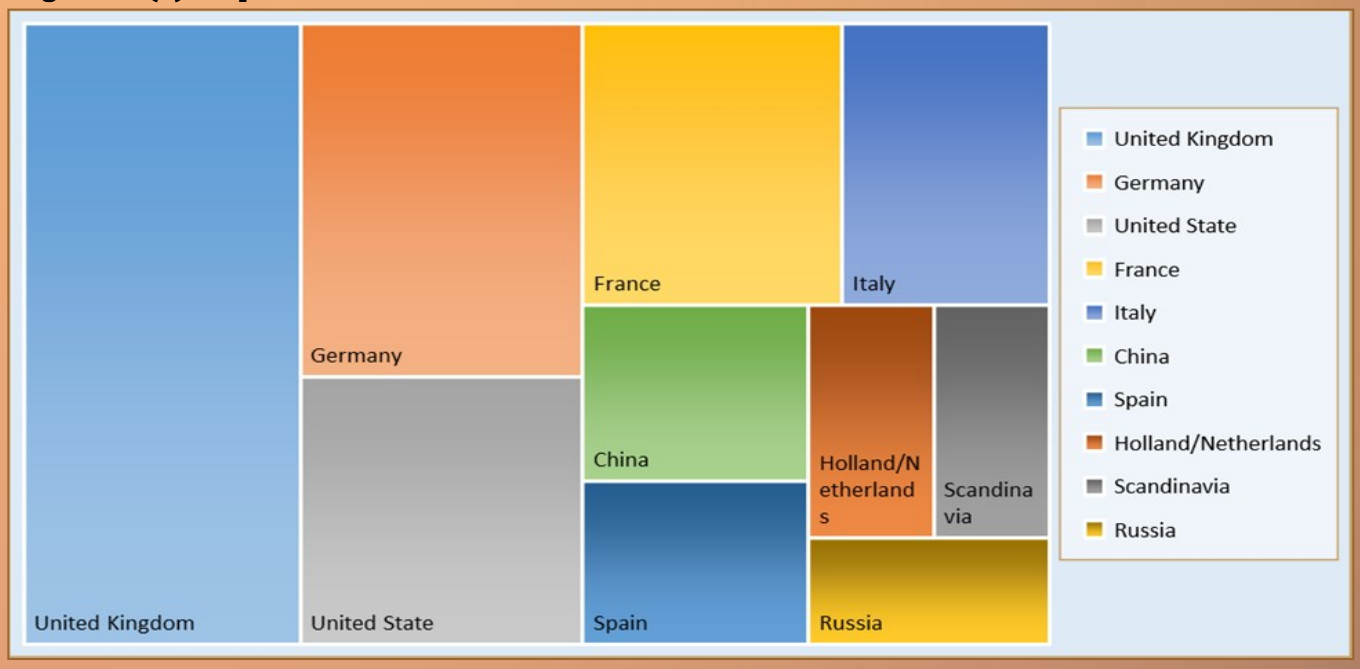

Figure 10(b): Top Ten Overseas Business Tourists, 2020

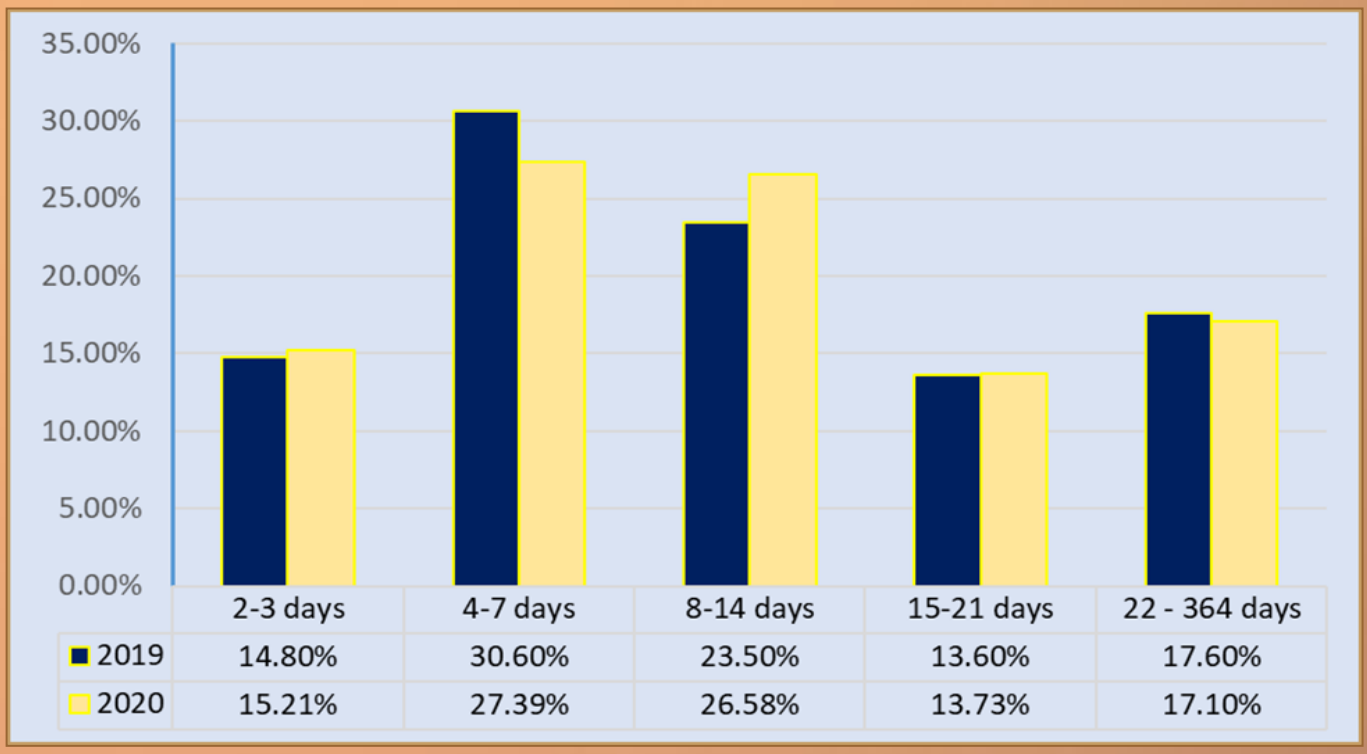

INTENDED LENGTH OF STAY

On average, the intended length of stay for tourists was 19 days which is good for the industry and the economy. This is higher than the average 15 days recorded in 2019. In 2020, most tourists intended to stay for 4-7 days. However this category observed a tremendous decrease of 90.5% from 2019. 45,072 intended to stay for 8-14 days which is a 91.7% decrease from the same category in 2019. Fewer tourists intended to stay between 15-21 days.

Overseas tourists make up the most share of the 8-14 days. This duration could be linked to the number of attractions that Namibia can offer and the vast distance for traveling to see the attractions. Tourists from the African market are the most who stay in Namibia for a period of 4-7 days. This could be due to a supposition that African travelers mostly come to visit friends and relatives as compared to international travelers who come for leisure.

Figure 11(a): Average Intended Tourists Length of Stay, 2020

	2-3 days	4-7 days	8-14 days	15-21 days	22 - 364 days
2019	14.80%	30.60%	23.50%	13.60%	17.60%
2020	15.21%	27.39%	26.58%	13.73%	17.10%

TOURISTS GENDER PROFILE

As it has been the case over the years when it comes to the distribution of tourists by gender, male tourists continue to dominate in visiting Namibia. 62.0% constituting 104,557 tourist arrivals were males as compared to 38.0% of females, representing 65,008 tourists. Furthermore, it is worth mentioning that the African market brought in more males than females while other markets had more females than males visiting destination Namibia as shown in figure 12(b).

Figure 12(a): Gender Distribution of Tourists, 2020

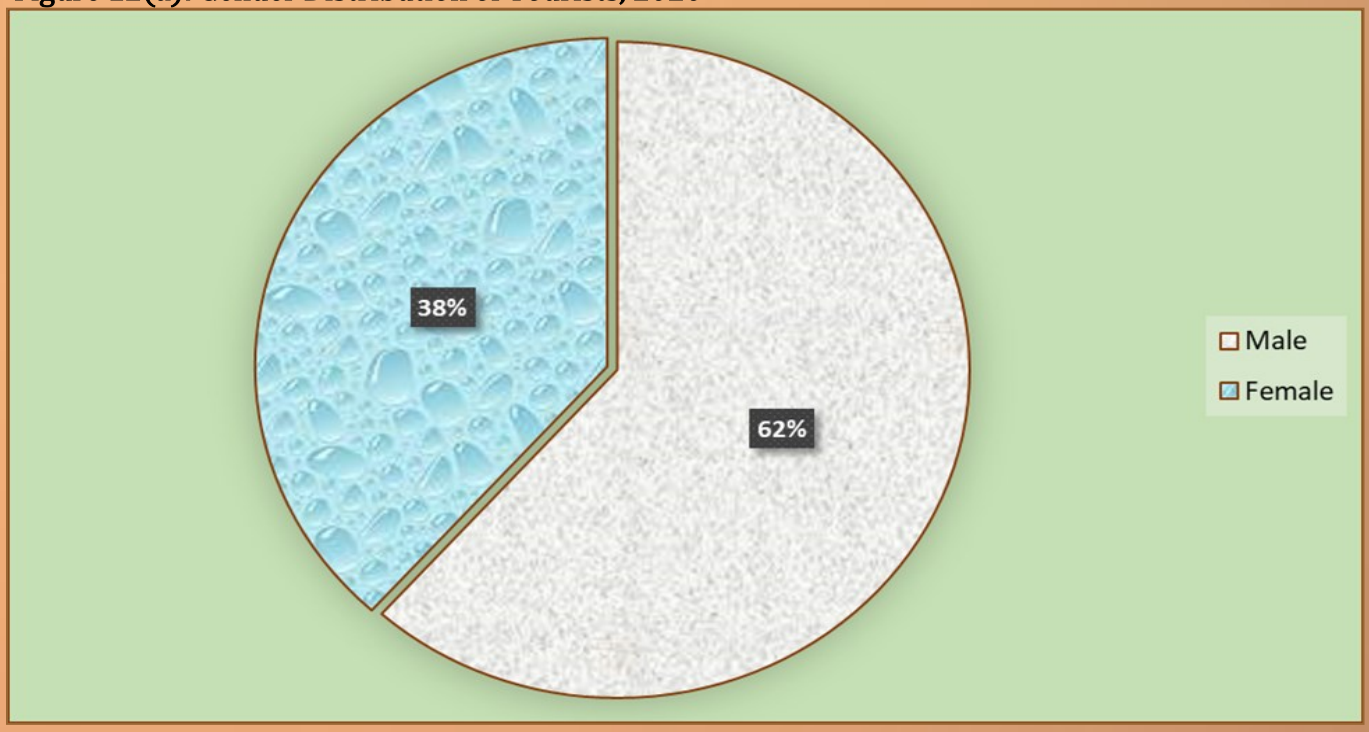

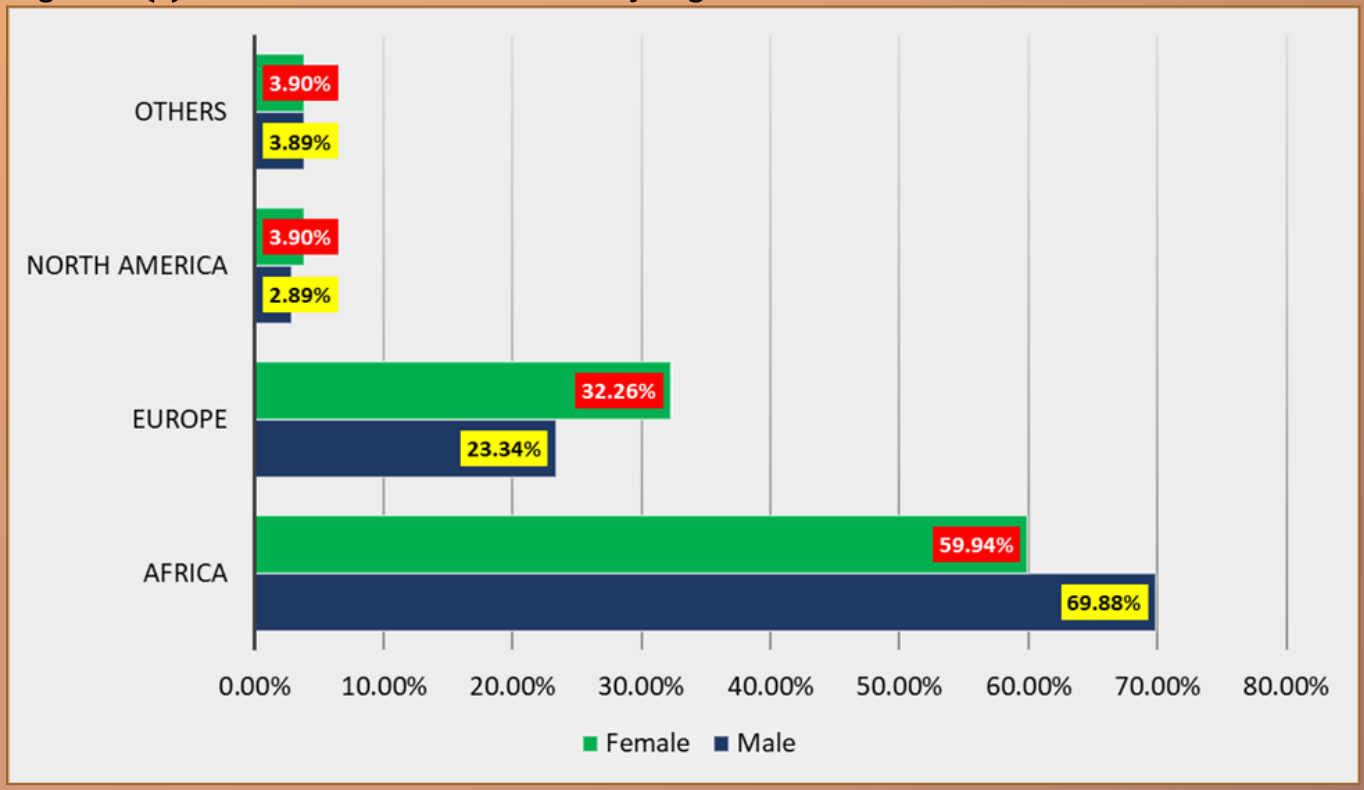

Figure 12(b): Gender Distribution of Tourist by Regions, 2020

TOURISTS AGE PROFILE

Figure 13 below, gives the distribution of tourist arrivals by age-group. It was observed that the age group that accounted for the highest number of arrivals was 30-39 years having a record of 23.8%, followed by the 40-49 age group with 20.5%. Those aged 50 years and above make up a total of 33.9%.

Figure 13(a): Tourists Age Distribution, 2020

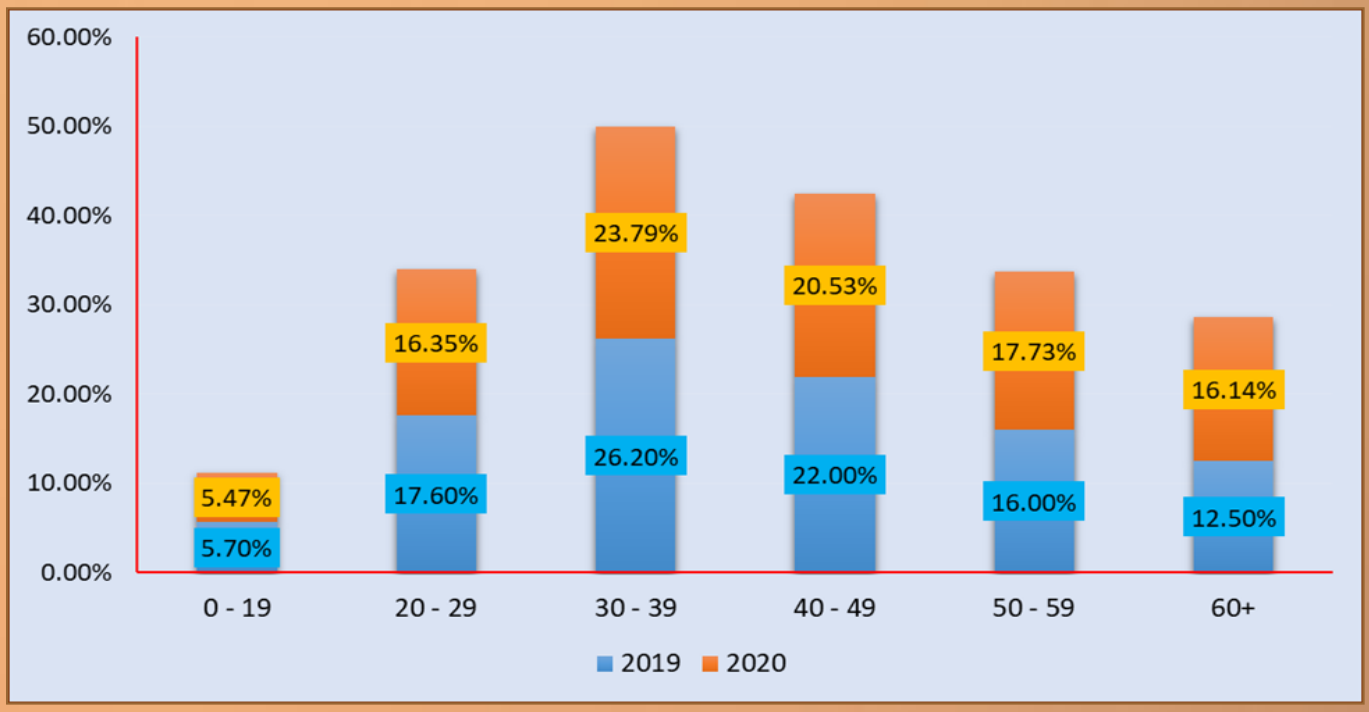

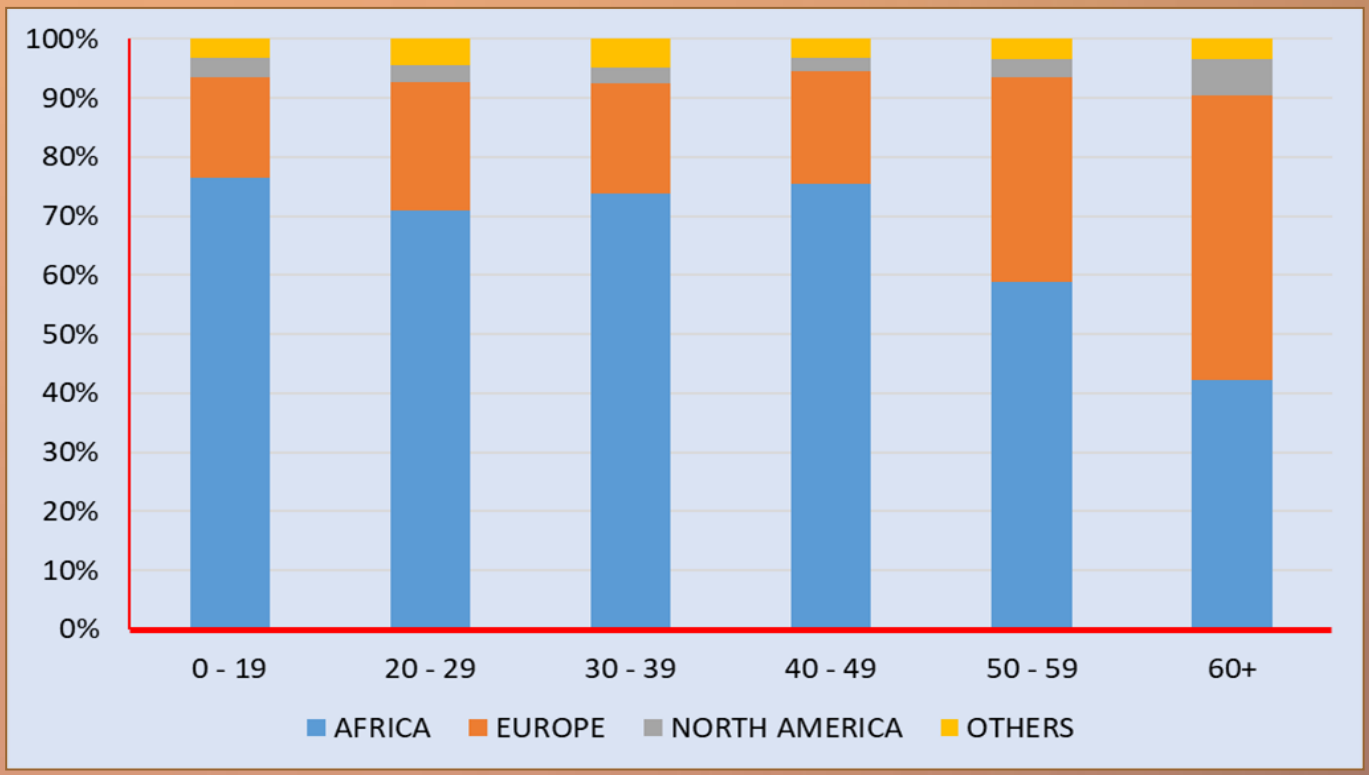

Figure 13 (b) : Tourists Age Distribution by Regions, 2020

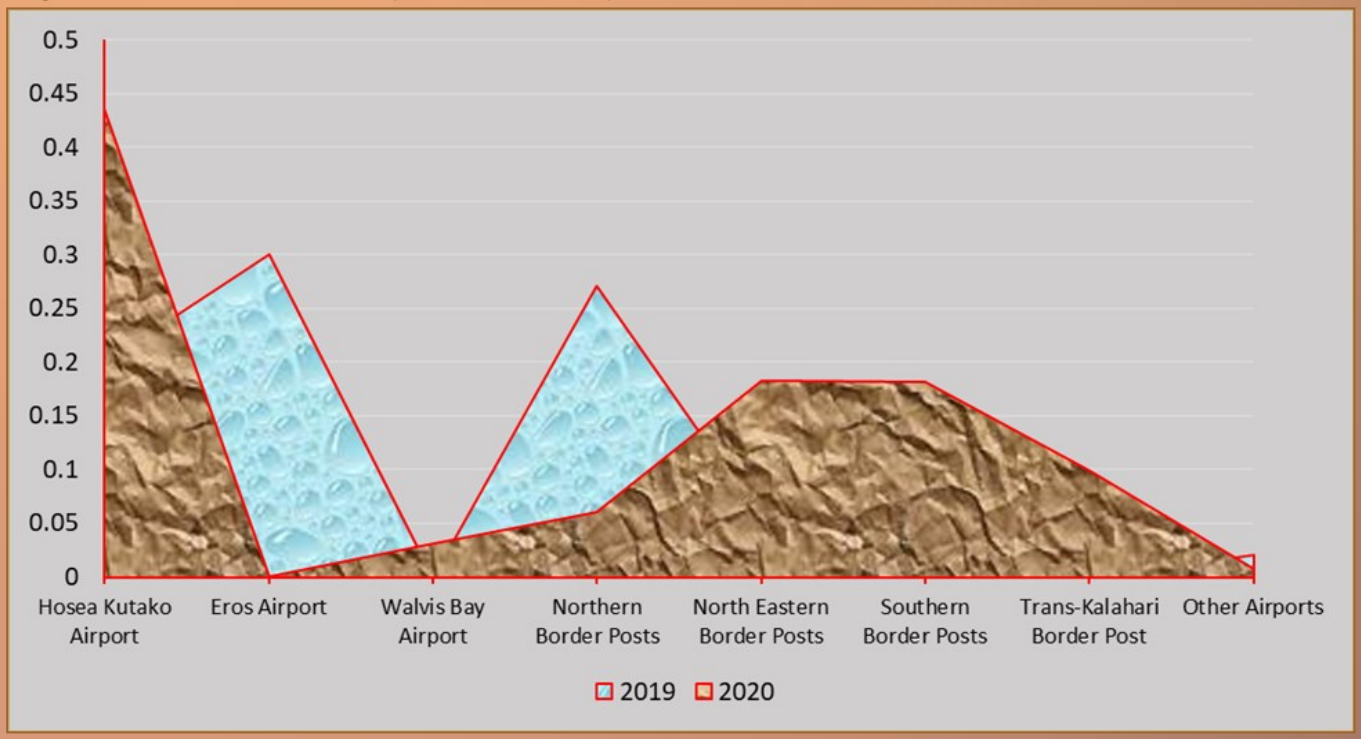

TOURIST POINTS OF ENTRY

During 2020, Hosea Kutako International Airport (HKIA) recorded the highest international tourists into Namibia with 43.6% followed by North Eastern Border Posts (18.3%) and Southern Border Posts (18.2%). Most of these arrivals through HKIA are from overseas tourist markets while arrivals through land borders were mainly used by tourists from neighboring countries. Entry through HKIA, Walvis Bay airport and Eros airport recorded 43.0%, 3.0% and 0.1% respectively. Since most land borders were closed due to measures adopted to control the spread of COVID-19, most tourists were compelled to use air transportation. This suggests that the growth of international access to Namibia will continue to be powered by air connectivity.

POINT OF ENTRY	2019	2020	CHANGE
Hosea Kutako Airport	19.9%	43.6%	↑
Eros Airport	0.0%	0.1%	↑
Walvis Bay Airport	1.0%	3.1%	↓
Northern Border Posts	30.0 %	6.1%	↓
North Eastern Border Posts	27.1%	18.3%	↑
Southern Border Posts	14.6%	18.2%	↑
Trans-Kalahari Border Post	5.2%	9.9%	↓
Other Airports	2.1%	0.7%	

Figure 14: Tourist Arrivals by Points of Entry, 2020

TOURISTS MODE OF TRAVEL

Travel by road has been found to be the most preferred mode of travel contributing 51.5% to total tourist arrivals. Tourist arrivals by air decreased by 88.3% from 683,551 in 2019 to 79,801 in 2020. Those arriving by road decreased by 89.9% from 863,389 to 87,284 and those arriving via sea also decreased by 93.6% from 38,639 to 2,480. Arrivals through sea have remained less than 2% from 2016 to 2018 and recorded a slight increase to 2.4% in 2019.

Arrivals from oversea markets have been pre-dominantly through air while tourists from African market mostly came through land. The status of air as a major overseas tourist mode of travel calls for the finalization of the revamping of the HKIA facilities.

Figure 15(a): Tourists Mode of Travel, 2020

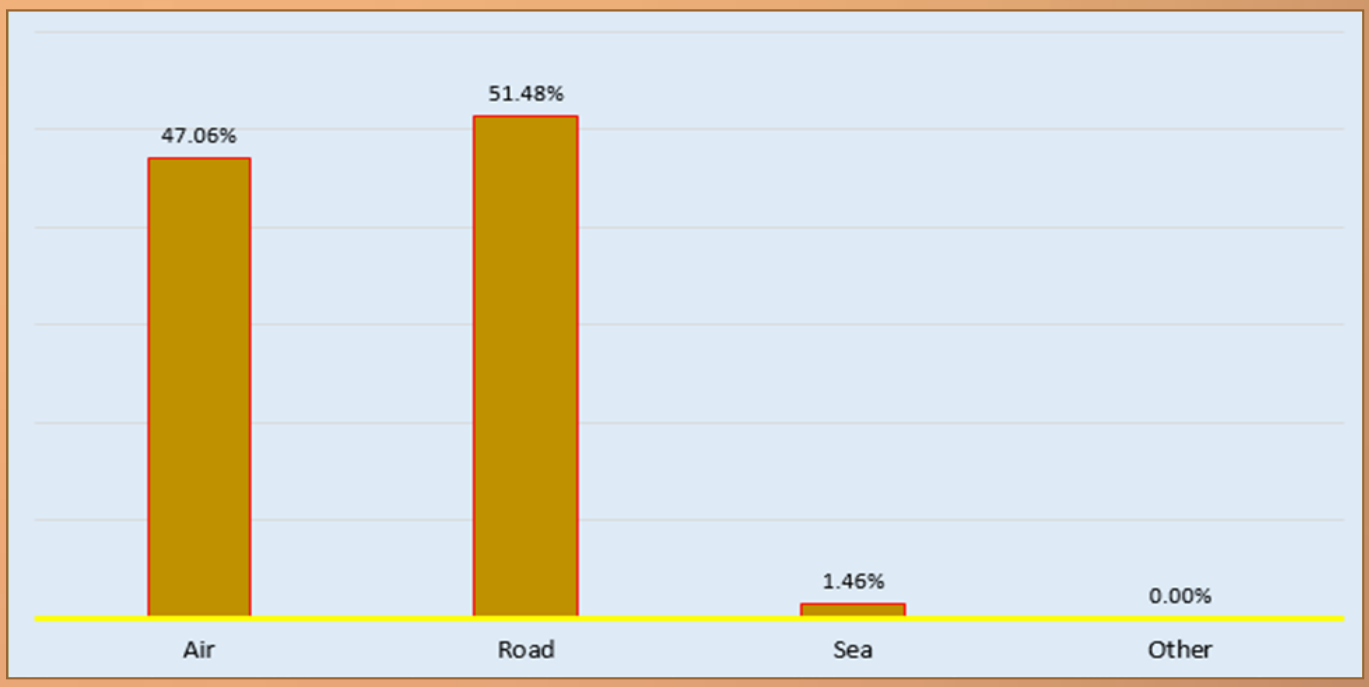

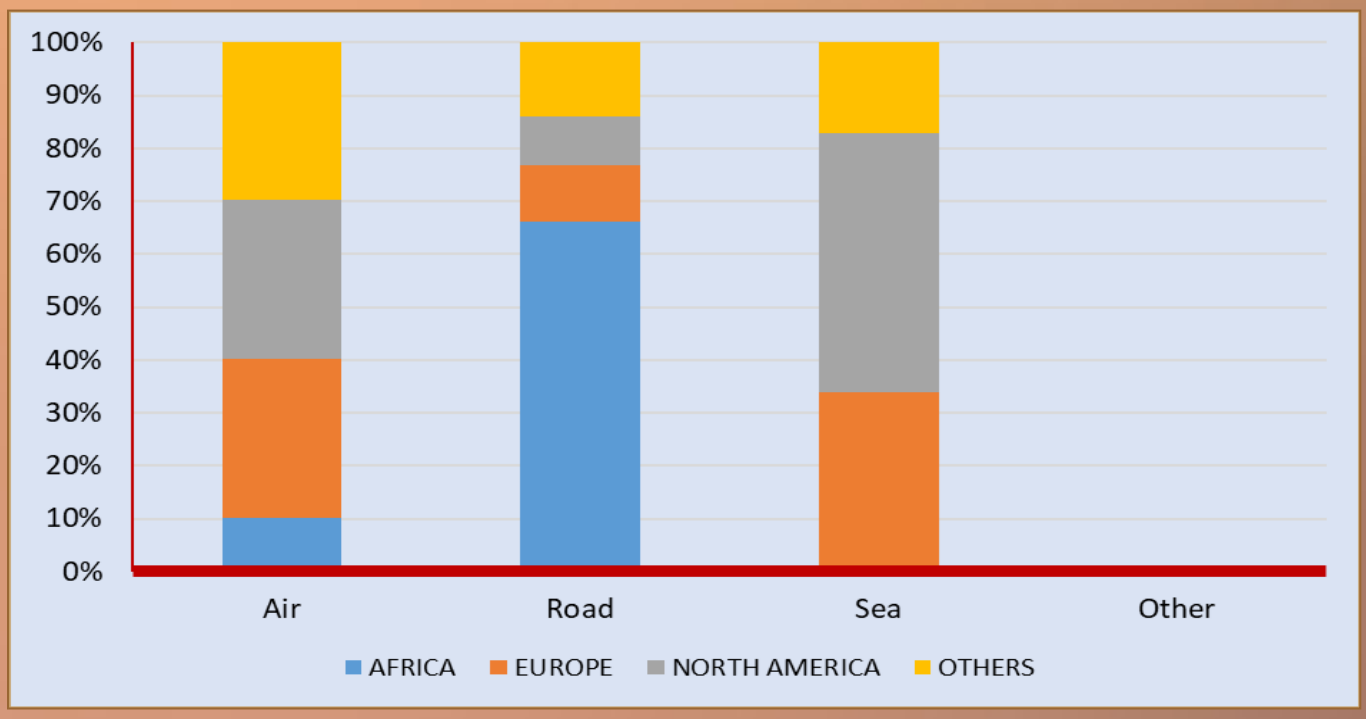

Figure 15(b): Tourists Mode of Travel by Regions, 2020

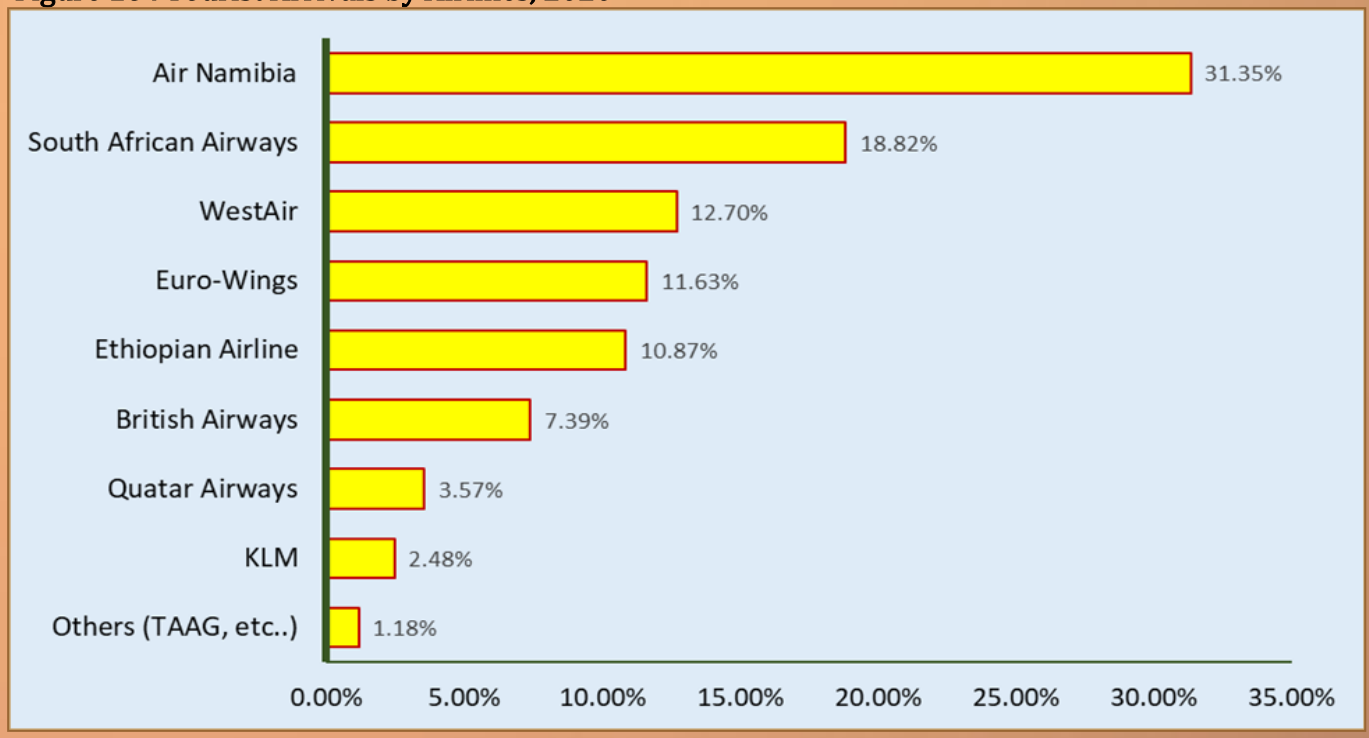

TRAVEL BY AIRLINE

The national airline (Air Namibia) brought in 31.4% of total tourist arrivals by air in 2020, a significant decrease compared to 2019. There is an interchange between the national airline and South Africa Airways compared to the corresponding period. It is worth noting the contribution of 12.7% to the total tourist arrivals by WestAir.

There has been a distinct increase in percentage towards arrivals by Ethiopian Airlines which accounted for 10.9%. This airline was one of the few that remained operational during the initial tourism revival period although the frequencies were reduced as the demand for traveling was low.

The effects of COVID-19 saw some airlines temporarily suspending operations and some grounding airlines which caused a reduction in the demand for air travel especially from overseas markets.

Figure 16 : Tourist Arrivals by Airlines, 2020

TOURISTS SEASONALITY OF TRAVEL

Total tourist arrivals decreased by 89.4% from 1,595,973 to 169,565 in 2020. The decrease can be attributed to the effect of COVID-19 pandemic. The highest number of tourists arrived in the 1st quarter of the year i.e. January to March, followed by 4th quarter October to December. During the months of April to August, there was no arrivals into the country as there was a national lockdown with flight restrictions, as measures to contain the spread of the virus.

Over the past years, July and August has been peak months for international tourists followed by October to December, and January to March. The weather conditions at the tourists' country of origin could be one of the important determinants of tourist arrivals.
The high and low seasons for arrivals of tourists to Namibia during 2020 are presented in figure 17 below:

Figure 17: Tourist Arrivals by Month, 2020

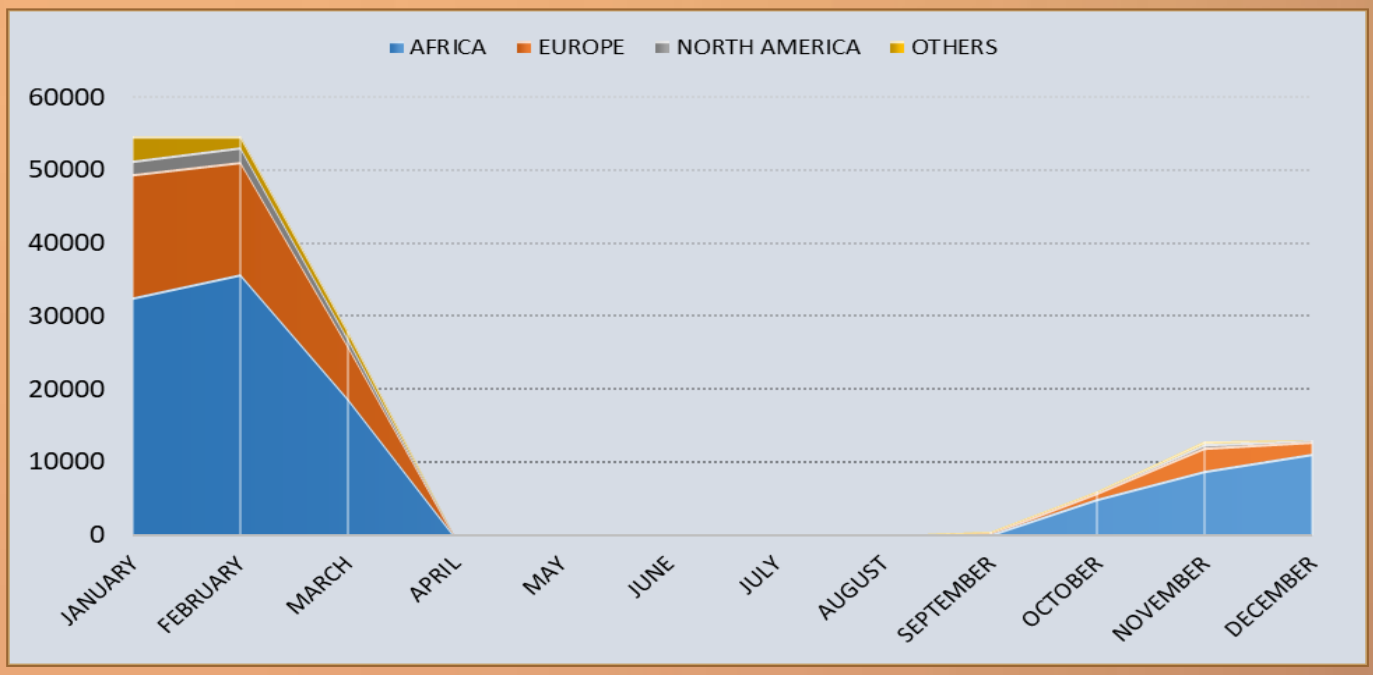

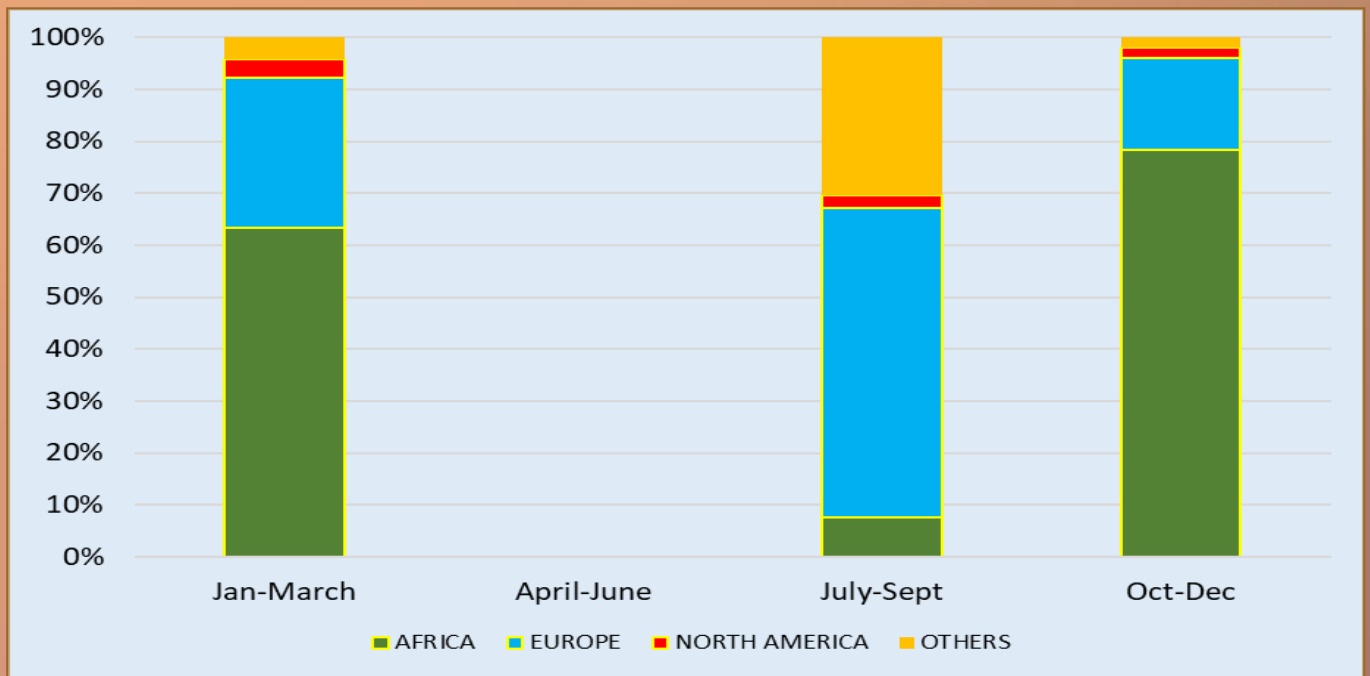

Figure 18: Tourist Arrivals by Quarters, 2020

EMPIRICAL REVIEW ON THE ANALYSIS OF COVID-19 IMPACT ON THE TOURISM SECTOR

COVID-19 has negatively affected the tourism sector in 2020 across the globe. According to the United Nations World Tourism (UNWTO) World Tourism Barometer (2020), International tourist arrivals (overnight visitors) fell by 72% during the period from January - October 2020 over the same period last year. The decline in the first ten months of the year represents 900 million fewer international tourist arrivals compared to the same period in 2019, and translates into a loss of US$ 935 billion in export revenues from international tourism, more than 10 times the loss in 2009 under the impact of the global economic crisis.

Based on current trends, UNWTO expects international arrivals to decline by 70% to 75% for the whole of 2020. The estimated decline in internationals tourism in 2020 is equivalent to a loss of about 1 billion arrivals and US$ 1.1 trillion in international tourism receipts. This plunge in international tourism could result in an estimated economic loss of over US$ 2 trillion in global GDP, more than 2% of the world's GDP in 2019.

The direct (value of industry output) contribution of the tourism industry, as proxied by the hotels and restaurant, and related transport services industries, amounts to just over 3% of Namibia's GDP. • The overall direct and indirect (including its wide value chain) contribution of the tourism industry prior to the COVID-19 pandemic was estimated to be 10% of GDP, supporting over 100,000 jobs (UNDP Macroeconomic Assessment, 2020).

The pandemic had also brought disruptions in most economic activities in Namibia. The Namibia Statistics Agency (NSA) conducted a survey on the effect of COVID-19 on selected businesses in Namibia resulting from the state of emergency. The survey was conducted into two phases; the first round was done from 30th April 2020 to 11th May 2020, while the second round covered a period from 27th July 2020 to 07 August 2020.

The survey results reveal that businesses were negatively affected by the Covid-19 pandemic, whereby some had laid off some workers, others operating partially and some closed down especially those heavily depended on tourists. The tourism businesses such as hotels, guesthouses, restaurants, tour operators amongst others are the most affected during the period of assessment. These businesses are expected to suffer more from the pandemic in coming months if the pandemic is not contained.

According to the NSA Media Release (2020), the domestic economy has registered contractions of 1.4 percent in the first quarter, 10.1 percent in the second quarter, and 10.5 percent in the third quarter. During the 3rd quarter (July – September 2020), hotels and restaurants are among the sectors contracted and contributed poorly to the Gross Domestic Product (GDP). The deeper contractions in the second and third quarters are a result of the impact of the Covid-19 restrictions.

The closure of national borders, restrictions on gatherings and movements in the country, quarantine measures imposed as well as the world-wide travel bans and restrictions led to substantial loss of profits due to travelers cancelling their bookings. These cancellations had been observed to have a direct detrimental effect on the financial resources of tourism businesses consequently leading to a reduction in wages and/ or job losses in the sector.

Experts in the tourism industry consider closure of borders, travel restrictions and quarantine as the main barriers hindering the recovery of international travelers, along with slow virus containment and low consumer confidence.

CONCLUSION AND RECOMMENDATIONS

For the first time in years, Namibia recorded a massive decline in the number of tourist arrivals with only 169,565 tourist arrived in 2020. These statistics provide sufficient evidence to conclude that the COVID-19 pandemic is the major cause of the drastic decline in the tourist arrivals period. Moreover, the coronavirus crisis interrupted the existing growth trend of tourist arrivals in Namibia.

The Namibian tourism sector continues to rely on inbound international tourists. The Government, main stakeholders and private sector need to work together to develop a strong domestic tourism demand with attractive tourism product offering, pricing incentives, and flexible business processes, digitization, online bookings, etc.

It was observed that international and national border closures, national lockdowns, curfews, declaration of state of emergency resulted in cancellations of travels and postponement of tourism travels, reduction of revenue and income, business closures, bankruptcy, redundancies, salary reduction, etc.

We will continue to work with other Governmental key stakeholders such Ministry of Home Affairs & Immigration, NTB, and the private sector to computerize data compilation, entry and exit, for fast production of national arrival statistics.

The cooperation of the key tourism sectoral players is required to sustain livelihoods, tourism businesses and growth of domestic tourism market. In the context of the ongoing Covid-19 pandemic, the sector must

- ◊ develop and offer affordable pricing options to domestic tourists aimed at attracting families or individuals to our tourism destinations across the country;
- ◊ develop and promote innovative nature-based tourism products offerings to stimulate local demand;
- ◊ strive to have all workers in the sector vaccinated against Covid-19 as far as possible for their own protection and for the protection of tourists.
- ◊ provide flexible administrative and bookings protocols to ease booking experience;

We are thankful to the Government of the Republic of Namibia and Namibia Airports Company for remodeling the Hosea Kutako International Airport as the main tourist hub to improve tourists/guest experience upon arrival and departure in Namibia.

The Ministry calls on the industry and travelers in Namibia for purposes of tourism to adhere to approved Tourism Industry Health and Safety Protocols to promote health and safety travel and stays in our beautiful country, Namibia.
